**DETAILED ACTION**

*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, 12-14 and 16-25, drawn to products and methods relating to SEQ ID NO: 1 or encoding SEQ ID NO: 2, classified in class 800, subclass 281, for example.
  - II. Claims 1-9, 12-14 and 16-25, drawn to products and methods relating to SEQ ID NO: 3 or encoding SEQ ID NO: 4, classified in class 800, subclass 281, for example.
  - III. Claims 1-9, 12-14 and 16-25, drawn to products and methods relating to SEQ ID NO: 5 or encoding SEQ ID NO: 6, classified in class 800, subclass 281, for example.
  - IV. Claims 1-25, drawn to products and methods relating to SEQ ID NO: 19 or encoding SEQ ID NO: 20, classified in class 800, subclass 281, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Groups I-IV are drawn to different sequences that are structurally and physically distinct.

Art Unit: 1638

Applicants are reminded that nucleotide sequences encoding different proteins are structurally distinct chemical compounds and are unrelated to one another. These sequences are thus deemed to normally constitute **independent and distinct** inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 et seq. This requirement is not to be construed as a requirement for an election of species, since each nucleotide and amino acid sequence is not a member of single genus of invention, but constitutes an independent and patentably distinct invention.

2. Because these inventions are distinct for the reasons given above and the search required for any of Groups I-IV is not required for any one of the other Groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
